GENERAL INDEX

A

Abies concolor, growth studies 1
Abscission, in leaf of orange 381; response, in bean, induced by 2,3,5-triiodobenzoic acid 447
Absorption, by bean leaves, of ammonium 2,4-dichlorophenoxyacetate 301
Acer pseudoplatanus and A. saccharophorum, growth studies 1
Allergenic plants, Puerto Rico 249
Allium cepa, effect of diethylstilbestrol on mitosis 526; of sulfa- compounds on nuclear and cell division 177
Amanita, nuclei and cytoplasmic inclusions in basidia 521
Ampholytes, relation to assimilation and recovery of ammonium and nitrate nitrogen in plant tissue 95
Anatomy, seedling, of Brachypodium distachyum 341
Andropogon scoparius, response to photoperiod 132
Anemophilous plants, Puerto Rico 249
Apple fruit, effect of temperature gradient on distribution of water 90
Ascorbic acid, in turnips and tomatoes, effect of micro-nutrient elements 506
Asparagine, effect on pea roots 435
Avery, George S., Jr., "Hormones and horticulture" 360

B

Barley, response to growth-regulators with ion exchangers 72
Basidia, nuclei and cytoplasmic inclusions, in Amanita 521
Beal, J. M., book review 539
Bean, carotene-destroying processes in leaves 204; effect of chlorophenoxy compounds on leaves 183, of 3-indoleacetic acid on mineral composition 268, of 2,3,5-triiodobenzoic acid on abscission 447; histological responses to growth-regulators 13, 183, 447; relation of light intensity to effect of 2,4-dichlorophenoxyacetic acid 231, 301; temperature coefficients of cell enlargement 225
Beeson, Kenneth C., Influence of toxic concentrations of micro-nutrient elements in the nutrient medium on vitamin content of turnips and tomatoes 506
Bernstein, Leon, Studies on the carotene-destroying processes in drying bean leaves 204
Blossom-end rot in tomato, effects of growth-regulating substances 501
Boatner, C. H., Pigment glands of cottonseed. III. Distribution and some properties of cottonseed pigments 108
Bond, Lora, Origin and developmental morphology of root nodules of Pisum sativum 411; Responses of pea roots to application of certain growth-regulating substances 435
Boron deficiency, histological responses and relation to photoperiod 237
Brachypodium distachyum, anatomy of seedling 341
Bromus inermis, effect of certain environmental conditions on flowering 59; vegetative responses to environmental variations 44
Brown, James W., Inactivation of 2,4-dichlorophenoxyacetic acid in soil as affected by soil moisture, temperature, the addition of manure, and autoclaving 314
Brunstetter, Byron C., Mineral composition of bean stems treated with 3-indoleacetic acid 268
Buckwheat, photoperiod and boron requirement 237
Burton, Daniel F., Formative effects of certain substituted chlorophenoxy compounds on bean leaves 183

C

Cain, Stanley A., book review 536
Caldwell, Ralph M., Selection and breeding for high β-carotene content (provitamin A) in tomato 219
Carotene content in tomato 219
Carotene-destroying processes in bean leaves 204
Castillon, L. E., Pigment glands of cottonseed. III. Distribution and some properties of cottonseed pigments 108
Castor bean leaves, temperature coefficients of cell enlargement 225
Cell division, effect of sulfa- compounds 177
Cell enlargement, temperature coefficients 225
Cell shape, in leaf of orange 381
Cephalostigma schimperi, embryology 85
Ceratopteris thalictroides, prothalli 349
Chao, Marian Dellers, Temperature coefficients of cell enlargement 225
Chlorophenoxy compounds, as herbicides 72, 194, 231, 276, 314, 324, 334; formative effects on bean 13, 183, 301, on flax 494, on oranges 150, on tomato 501
Citrus sinensis, effects of 2,4-dichlorophenoxyacetic acid 150; leaf anatomy 381
Claus, Edward P., A study of the anemophilous plants of Puerto Rico 249
Cocklebur, photoperiod and boron requirement 237
Cold Spring Harbor Symposia on Quantitative Biology, "Nucleic acids and nucleo-proteins" 537
Comocladia dentata, response to 2,4-dichlorophenoxyacetic acid 334
Contratoxification of growth-regulators 276
Copeland, Edwin Bingham, "Genera Filicum: the genera of ferns" 535
Copy, preparation for the Botanical Gazette 540
Corn, effect of 2,4-dichlorophenoxyacetic acid 324
Cosmos sulphureus Cav. var. Klondike, influence of photoperiod 120
Cottonseed pigments, distribution and properties 108
Crop plants, response to O-isopropyl N-phenyl carbamate 473
Cucumber, response to O-isopropyl N-phenyl carbamate 473; use in method for determination of 2,4-dichlorophenoxyacetic acid in aqueous solution 39

D

Dandelion, temperature coefficients of cell enlargement 225
Dangeard, Pierre, "Cytologie végétale et cytologie générale" 539
Daubenmire, R. F., Comparative studies of growth in deciduous and evergreen trees 1; "Plants and environment: a textbook of plant autecology" 536
Davis, Charles C., Gymnodinium brevis sp. nov., a cause of discolored water and animal mortality in the Gulf of Mexico 358
Deficiency-duplication in einkorn 258
Deters, M. E., Comparative studies of growth in deciduous and evergreen trees 1
Dibbern, John C., Vegetative responses of Bromus inermis to certain variations in environment 44
Dichlorophenoxyacetate, ammonium 2,4-, absorption and translocation in bean plants 301; histological response in bean 13; contratoxification 276; as herbicide 194; reaction with ion exchangers 72; 2,4-diethanolammonium, effect on fruit-drop and morphology of oranges 150
Dichlorophenoxyacetic acid (2,4-), contratoxification in soil 276, 314, 324, and on plants 276, effect on bean 13, 183, 231, 276, 301, on corn 324, on fruit set, yield, and blossom-end rot in tomato 501, on hypocotyledonary buds of decapitated flax 494, on oranges 150, on respiration in wheat and mustard seedlings 162; as herbicide 72, 194, 231, 276, 314, 324, 334; histological responses in bean 13, 183; inactivation in soil 276, 314, 324; method for determination in aqueous solution 39; reaction with ion exchangers 72; relation of light intensity to effect 231, 301
Dichrostachys nutans, response to 2,4-dichlorophenoxyacetic acid 334
Diethylstilbestrol, effect on mitosis in Allium cepa 526
Dittmer, Howard J., A comparative study of the number and length of roots produced in nineteen angiosperm species 354
Doyle, William L., book review 537

E

Eames, Arthur J., "An introduction to plant anatomy" 236
Einkorn, deficiency-duplication 258
Embryology of Cephalostigma schimperi 85
Emerson, Fred W., "An introduction to the science of botany: basic botany" 536
Ennis, W. B., Jr., Responses of crop plants to O-isopropyl N-phenyl carbamate 473
Enzymic destruction of carotene in bean leaves 204
Esau, Katherine, book review 361

F

Fagus grandifolia, growth studies 1
Fern gametophytes, Trichomanes and Hymenophyllum 363
Flax, reaction to 2,4-dichlorophenoxyacetic acid 494
Flowering and photoperiod, in smooth brome grass 59; in Cosmos 120; in Andropogon scoparius 132
Fraxinus americana, growth studies 1
Fruit-drop, in orange, effect of 2,4-dichlorophenoxyacetic acid 150
Fruit set in tomato, effects of growth-regulating substances 501
Fuller, Thomas C., Effects of several sulfa- compounds on nuclear and cell division 177

G

Gall, Harold J. F., Flowering of smooth brome grass under certain environmental conditions 59
Gametophytes, Hymenophyllum and Trichomanes 363
Gas exchange, effect of 2,4-dichlorophenoxyacetic acid 162
Gossypium hirsutum, distribution and properties of pigments 108
Grant, Virginia Q., A rapid sensitive method for determination of low concentrations of 2,4-dichlorophenoxyacetic acid in aqueous solution 39
Grass, anatomy of Brachypodium distachyum 341; effect of environmental conditions on flowering of smooth brome 59; effects of variations in environment on vegetative responses of smooth brome 44; effect of photoperiod 59, 132
Growth, of brome grass in relation to environmental factors 44; in deciduous and evergreen trees 1
Growth-regulating substances, absorption and translocation in bean plants 301; contratoxification in soils 276, 314, 324, and on plants 276; effects on abscission in bean 447, on bean leaves 183, on fruit-drop and morphology of oranges 150; on fruit set, yield, and blossom-end rot of tomato 501, on gas exchange in wheat and mustard seedlings 162, on hypocotyledonary buds of decapitated flax 494, on mineral composition of bean stems 268, on pea roots 435; as herbicides 72, 194, 231, 276, 314, 324, 334; histological responses 13, 183, 435, 447; inactivation in soil 276, 314, 324; method for determination in aqueous solution 39; reaction with ion exchangers 72; relation of light intensity to effect 231, 301; residual effects in soil 324; response of crop plants 473
Gymnodinium brevis sp. nov., cause of discolored water, animal mortality 358

H

Hall, C. M., Pigment glands of cottonseed. III. Distribution and some properties of cottonseed pigments 108
Hamner, Charles L., Weed control in soils with 2,4-dichlorophenoxyacetic acid and related compounds and their residual effects under varying environmental conditions 324
Harper, R. H., Selection and breeding for high β-carotene content (provitamin A) in tomato 219
Hay-fever plants in Puerto Rico 249
Helianthus annuus, photoperiod and boron requirement 237
Herbicidal value of 2,4-dichlorophenoxyacetic acid and 2,4,5-trichlorophenoxyacetic acid 194
Herbicides, contratoxification in soil 276, 314, 324, and on plants 276; reaction with ion exchangers 72; relation to light intensity 231, 301; use on crop plants 473; use on tropical plants, in Hawaii 194, in Cuba 334
"Heredity and variation in microorganisms" 235

Histological responses to boron deficiency 237; to plant growth-regulators, in bean 13, 183, 447, in pea roots 435
Histology of bean leaves 183; of pea root nodules 411
Hymenophyllum gametophytes 363
Hypocotyledonary buds, in flax 494

I

Indoleacetic acid, effect on mineral composition of bean stems 268; effect on pea roots 435
Ion exchangers, reaction with growth-regulators 72
O-isopropyl N-phenyl carbamate, contratoxification in soil and on plants 276; reaction with ion exchangers 72; response of crop plants 473

J

Jakowska, Sophie, Effects of diethylstilbestrol on Allium cepa 526
Johnson, Elizabeth B., "Hormones and horticulture" 360
